

No other hospital in Richmond is better prepared than CJW's Levinson Heart Hospital.

During an emergency, when minutes count, it's where cardiologists and heart surgeons are within quick reach of our Emergency Chest Pain Center.

We are the region's only fully dedicated heart hospital, performing the most procedures and getting the best results for cardiac care in Richmond.

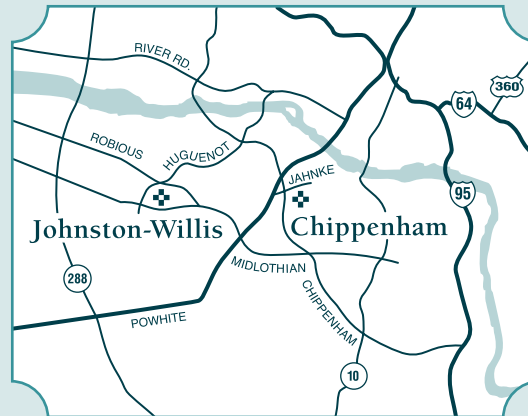

**It's Your Heart.
Choose Wisely.**

CJW Medical Center
Chippenham & Johnston-Willis

HCA Virginia

CJW is a two-campus medical center. With the resources and expertise of our Chippenham and Johnston-Willis campuses, CJW is able to provide a combination of clinical services, technology, and outcomes that are unsurpassed in the region. There is a difference between hospitals. Choose wisely.

AN HCA RICHMOND HOSPITAL

A Higher Standard of Heart Care

*Inside Richmond's Only
Dedicated Heart Hospital*

CJW Medical Center
Levinson Heart Hospital at Chippenham

HCA Virginia

Richmond's One-of-a-Kind Heart Hospital

CJW's Levinson Heart Hospital is Richmond's only dedicated heart hospital, designed from the ground up for outstanding cardiac care. Physicians and nurses at the Levinson Heart Hospital are achieving some of the best patient outcomes in America. In fact, our overall cardiac care has been rated **Best in Richmond** five years in a row by HealthGrades. We are also the only Richmond hospital to be named four times to the list of **100 Top Hospitals Cardiovascular** by Solucient, a leading national healthcare information company.

The Most Advanced Cardiac Surgery Suite in Central Virginia

Our four cardiac operating rooms feature technology unavailable elsewhere in the area. Real-time patient data and images are displayed on 52-inch, high-definition plasma screens that also allow for videoconferencing. This means that during an operation, the surgeon never has to leave the patient's side to confer with another physician who may be in another part of the hospital, or even in another part of the world.

We also have one of the area's few robotic-assisted da Vinci® Surgical Systems. The da Vinci enables surgery through tiny holes, or "ports," between the patient's ribs. Seated at a console near the patient, a surgeon views a 3-D image of the surgical area, controlling two robotic arms which translate hand movements into ultra-precise movements, allowing for ever-finer surgery.

It's All About Better Patient Care

New technology is also making a difference in our Cardiac Surgery Intensive Care Unit and Cardiac Progressive Care Unit. Thanks to in-room charting systems, nurses can enter data or view a patient's chart right from the bedside. This allows nurses to spend more time with their patients, providing an even greater measure of care.

Prepared for Cardiac Emergencies

CJW's Chippenham Campus Emergency Department has a chest pain observation unit and critical care emergency bays. When a patient arrives with a suspected heart attack, they are on the first floor of the Levinson Heart Hospital, within quick reach of the specialized staff and equipment needed to diagnose and treat heart conditions.

Cardiac Catheterization Labs

We have five cardiac catheterization labs and an electrophysiology suite, where cardiologists use the latest digital imaging systems, including the world's first all-digital X-ray cardiovascular imaging system. Here, physicians have a more precise view than ever as they carefully position stents, guidewires and catheters.

Outstanding Vascular Care

CJW has a dedicated inpatient unit and the latest tools to treat blocked arteries, blood clots and more. Dedicated, board-certified vascular surgeons, interventional radiologists, cardiologists and others work together to ensure each patient receives the most appropriate treatment, whether minimally invasive or traditional. Our diagnostic vascular labs are fully accredited by the Intersocietal Commission for the Accreditation of Vascular Laboratories.

Cardiac Rehab

CJW offers inpatient, outpatient, and maintenance programs in cardiac rehab, which are custom tailored for each patient and approved by the patient's own physician. Cardiac rehab programs include exercise plans, education, and individual or group counseling sessions to help patients tackle tough problems such as stress, obesity, hypertension, smoking, diabetes, or abnormal lipid levels.

Nationally Recognized for Clinical Excellence — Year After Year

HealthGrades has rated our overall cardiac care the best in Richmond every year from 2001 - 2005. Solucient has ranked us among the nation's 100 top cardiovascular hospitals four times. Learn more about HealthGrades and Solucient and see how they rate hospitals across the nation by visiting their websites at HealthGrades.com and 100TopHospitals.com.
